- Exposure to root cause analysis of defects and failed test scripts.
- Expertise in writing Test cases and Executing Test cases in Selenium based Framework

## PROJECT EXPERIENCE HIGHLIGHTS

---

### *Applications : Insurance Based*

Role : Automation Tester

#### **Project Description:**

Using PEGA, QBE has been able to optimize underwriting processes and move toward its vision of a paperless office. QBE has improved the productivity of its underwriters, increasing time spent focusing on new business versus administrative tasks. The results include a higher number of transactions processed by staff, improved Gross Written Premium (GWP) undeviating per staff, and reduced stationery and storage costs.

#### **Responsibilities:**

- Understanding and analyzing the Business and Functional requirements of the project and preparing test scenarios based on that and to execute them.
- Performed various kind of testing (System testing, Regression testing, Integration, Sanity testing and Smoke testing) to make sure product goes flawless to the production.
- Understanding the Automation Framework model.
- Creating automation scripts using hybrid framework (**TestNG**).
- Involved in Framework Development for RAPTOR Application (**ROBOT Framework**).
- Involved in peer reviews of automation scripts.
- Executing scripts for regression.
- Attending Scrum meeting to update the scrum master on testing status.
- Preparing Daily status Report.
- My next responsibility was to make sure all the defects are reported in JIRA as early as possible with the proper description, steps to re-produce along with the evidences.

Have always followed up on the defects till the defect closure and provided the defect retesting evidences in JIRA

---

### *Applications Name: eQuipt Client Portal, eQuipt NAO*

#### **Client: Financial Domain**

Role: Automation Tester

**Project Description:** Advisor Group, Inc. is an independent company owned by Advisor Group Holdings, Inc. Our mission is to help your financial professional serve your financial needs by providing them with tools and resources to manage your account and develop appropriate investment solutions based on your goals

#### **Responsibilities:**

- Understanding and Updating the Automation Framework based on **Cucumber BDD** .
- Creating and maintaining of Regression Suite for GUI application using **Cucumber BDD Framework** .
- Automated **API** Endpoints using **Rest-Assured** Framework.
- Have Exposure of CI/CD tool **Azure DevOps**.
- Understanding and analyzing the Business and Functional requirements of the project and preparing test scenarios based on that and to execute them.
- Performed various kind of testing (System testing, Regression testing, Integration, Sanity testing) to make sure product goes flawless to the production.

## EDUCATION

---

Bachelor of Engineering in Computer Science & Engineering

*Aug 2013 -JUN 17 (BHOPAL)*

*Oriental College Of Technology*

7.21 CGPA

Higher Secondary School Certificate (CBSE)

*APRIL 2012 -MARCH 13 (BURHANPUR)*

*Burhanpur Public School, Burhanpur M.P.*

73.5%

Secondary School Certificate (CBSE)

*APRIL 2011 -MARCH 12 (BURHANPUR)*

*Burhanpur Public School, Burhanpur M.P.*

8.8 CGPA
